Search results – further options

- Order results sorted by BDS sales score (see column 2 description).
- eBooks and non-UK Titles are excluded by default to make search results more relevant.
- Filtering options by Gardners stock, shop stock, binding and NYP.

Customer & Stock Order Creation

As well as the old Customer and Stock Order buttons, there are two further enhancements. Double clicking on a row will bring up a new order form set to the default order supplier. Secondly, clicking on the name of a supplier in column 3 will open an order for that supplier as per PRH below:

Guide to each segment

Column 1: Jacket

The title jacket is shown on each line of the search results, helping much quicker identification of the correct book.

Column 2: General Information

5 ingredients. Mediterranean Oliver, Jamie 31 Aug 23 - Michael Joseph 9780241431160

Basic information:

Title, Author, Publication Date, Publisher and EAN.

A single click of the EAN in column 2 as shown above will copy the EAN.

Column 2 Cover, RRP, Type of Title and Ranking

| HARDBACK | £28.00 | |
|-------------------|--------|--|
| General - Trade | | |
| 22 UK Sales Score | | |

Cover, price and type of title are listed in column 2. The UK Sales Score is an algorithm based on reported sales data of (anonymised) BatchLine shops.

Column 3 Price and Availability and Distributors

Price and Availability Tab

| Price and Availability | distributor | S | |
|--------------------------|-------------|------|--------------------|
| Batchline Bookshop | £10.00 | 0 | No Stock |
| Gardners | £28.00 | 51 | Available @ 35.00% |
| Penguin Random House TBS | £28.00 | 1000 | Available |

The above data shows the contents of the Price and Availability tab:

- Your Bookshop availability. In this case the title has been stocked in the past, but you have no stock at present and shows a previous sales price of £10.
- Gardners: Current RRP, number in stock and discount.
- Penguin Random House: RRP and at least 1000 available.

Distributor Tab

New! Macmillan (MDL) Hotline Option

A new **Order Priority** drop-down menu has been added to the Order Header Form. At this time the option of **'Hotline'** is only applicable to Macmillan and if selected should speed the delivery time of that order. We have populated the drop-down list with other options that adhere to the Order Transmissions standards. **Note:** Other options in the list will currently have no effect, but have been included for future compatibility. (Please check with Macmillan that this option is available with your account.)

Stocktake User Interface & Stock Discrepancy Improvements

Stocktaking has had four major improvements:

- Instead of the traditional 'Send To' from ISBN Lists we have introduced an import direct to the stocktake form.
- Once a category has been imported it is possible to see the live discrepancies between current stock and items scanned.
- Overall discrepancies once processed will show as red and green to indicate items missing or found.
- Once the stocktake has been processed we now automatically create a number of spreadsheets to show the stocktake results.

ISBN List Import

A new button has been added to the stocktake form for importing directly from an ISBN List meaning the old 'Send To' method is no longer required (although is still available).

Category Discrepancy

A new drop-down list called Stock Take Category has been added to the form. Once a list has been added to the stocktake table, selecting that category from the drop-down list will display the discrepancies between **Current Stock** and **Stock Take**:

Values shown are:

- Number of titles before and after with difference
- Number of books before and after with difference
- Value before and after with difference

Once the stocktake has been completed, clicking on the discrepancy button on the main Stocktake Form will show before and after values. Any differences are highlighted in red or green: items in red showing items and values less than before and green greater than before.

Automatic Spreadsheet Generation

After the stocktake is completed BatchLine will export 6 dated spreadsheets to the Stock Takes directory in the BatchLine install folder.

- Missing titles (MissingTitles_dd-mm-yyyy.xlsx)
- Titles where the stocktake quantity is more than you had in stock (MoreThanExpected_dd-mm-yyyy.xlsx)
- Titles where the stocktake quantity is less than you had in stock (LessThanExpected_dd-mm-yyyy.xlsx)
- New Titles Found during the stocktake that BatchLine had never seen before (NewTitlesFound_dd-mm-yyyy.xlsx)
- All Discrepancies (AllDiscrepancies_dd-mm-yyyy.xlsx)
- Detail spreadsheet of your entire stocktake (StockTakeDetail_dd-mm-yyyy.xlsx)

Other Improvements & Tweaks:

- Start-up time will be greatly reduced. (A boot-up that processes the Daily Update can still be slow, but the normal start-up times have been improved.)
- Better handling of Daily Update to avoid daily update locking.
- Customer Invoice sale BookScan reporting bug fixed.
- Icons now change scale with Windows Zoom to provide more consistent user experience across different screen sizes.
- The automatic email error reporting to Batch has been improved.
- A User Guides Icon links to our BatchLine YouTube channel.
- A link from Back Office goes directly to the LogMeIn123 website.
- Customer Slip print out inaccuracies have been fixed in the case of multiple deliveries/pick-ups for the same customer order.
 - Previously if a customer picked up part of their order and then the rest at a later date, the second customer slip qty would be printed incorrectly.
- BatchLine client and Openbravo client auto server address configuration reduces connection issues from clients where local DNS issues occur.
